EDUCATION AND QUALIFICATIONS

Bachelor of Science in Information Technology

North-West University (NWU)

01/2022 – 11/2025 | Vanderbijlpark, Gauteng

- Academic Average of 82.17%

SKILLS

C# (.NET)

Enterprise backend development and system integration.

SQL Server & Data Engineering

Microsoft SQL Server (SSMS), stored procedures, complex queries, views, data modelling, reporting, and performance-aware query design.

Backend Application Architecture

Service-layer design, relational data modelling, and SQL-based data access for enterprise systems.

Systems & Networking

TCP/IP fundamentals, DNS/DHCP concepts, Windows & Linux environments, PowerShell scripting for automation, system configuration, and troubleshooting.

Tools & Platforms

Git & GitHub, Docker, Microsoft SQL Server (SSMS), Visual Studio, VS Code, Windows & Linux environments, REST API tooling, CI/CD fundamentals

INTERESTS

AI pipelines and Fine-tuning

Building AI-driven automation pipelines and model fine-tuning.

Profile

Software Engineer with 5+ years of experience across enterprise systems, academic engineering work, and production SaaS environments. Strong expertise in C# (.NET) backend development and Microsoft SQL Server, including stored procedures, complex queries, and data modelling. Experienced in maintaining and modernising long-lifecycle systems, supporting production workloads, and operating within structured, reliability-focused environments. I bring a disciplined, systems-first approach with the ability to onboard complex platforms quickly and contribute effectively to enterprise and industrial IT teams.

WORK EXPERIENCE

Systems Engineer

BCMTrac

08/2025 – Present | Remote

- Contributed to the development and maintenance of production enterprise systems within a live SaaS environment.
- Implemented C# backend logic and worked extensively with SQL Server, including stored procedures and complex queries.
- Supported system stability, defect resolution, and controlled enhancements in reliability-focused environments.

Internship

North-West University

01/2024 – 01/2025 | Vanderbijlpark, Gauteng

- Designed and implemented internal support tools to improve programme workflows, including structured data cleaning and preparation for research datasets.
- Improved LMS (eFundi) workflows using cloud-based collaboration tools, enhancing accessibility, data consistency, and operational efficiency.
